Profile

Blockchain Developer, Experienced in Decentralized applications and Blockchain projects. I love challenges, especially decentralization in finance and fintech. I have designed and built decentralized projects which work on blockchain now. And I love to work more with Blockchain projects.

Experience

November 2021—Present

Amirkabir science company • Iran, Tehran

I've been working on Amirkabir company as a full-time Blockchain developer. This company works on fintech and provides software services for other companies. Our team work on blockchain applications. I and two of frontend developers have been working on Blockchain-based projects. Chamrosh and Bocoïn were two projects that I developed their smart contracts and web3 interaction in frontend.

May 2020—November 2021

Yasina company • Ahvaz-Iran

Yasina is a financial company that works in the stock and commodity market of Iran. I worked there as a financial analyzer and data analyzer. Actually, I wrote filters for data of the market and analyzed them by the chart.

Education

June 2019

Bachelor of Economic in Chamran University – Iran - Ahvaz
